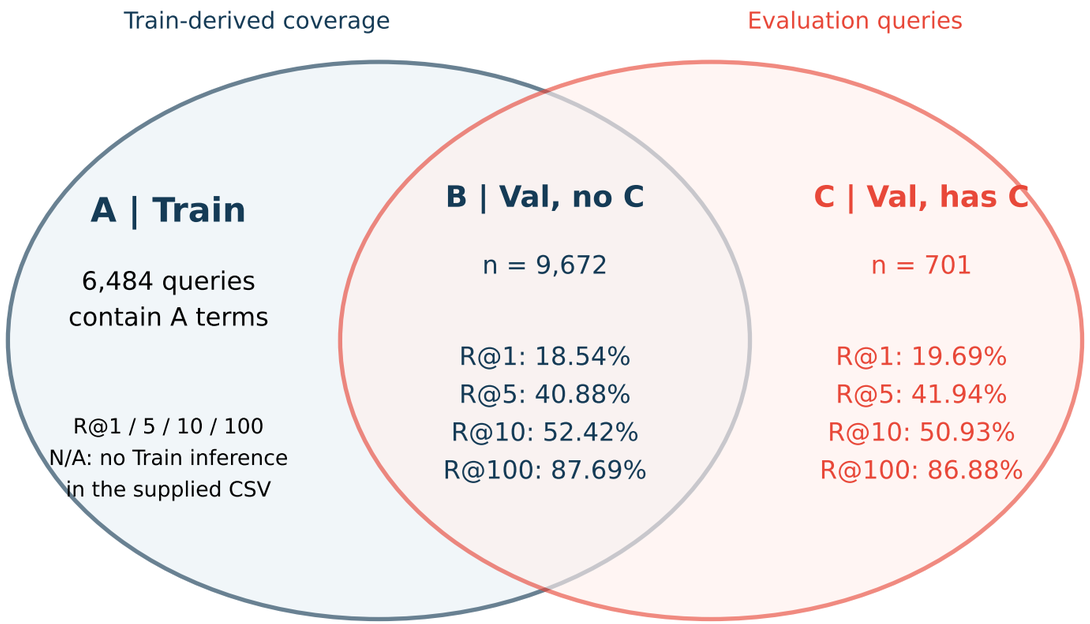
A / B / C regions and query-level retrieval performance

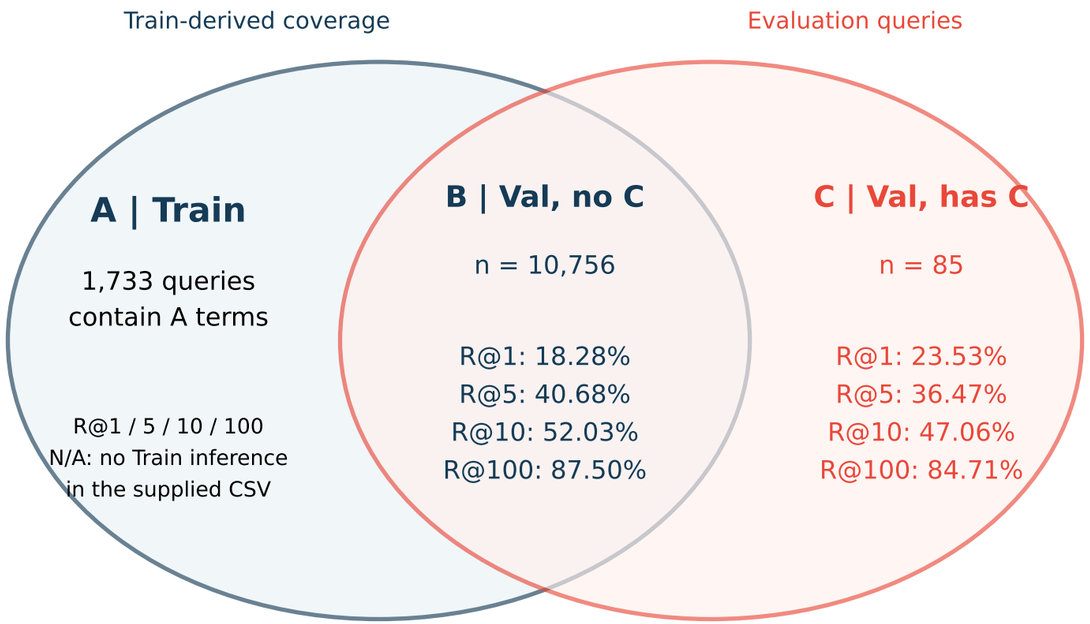
Evaluation cohort: C if any C term; otherwise B when at least one valid B term is present.

Object



Separate: EMPTY 512 | REVIEW_ONLY 10

Action



Separate: EMPTY 52 | REVIEW_ONLY 2

Counts above are queries, not unique lemmas or synonym-pair rows. B and C evaluation cohorts do not overlap.

C queries can also contain B words. Ellipse areas are schematic. A recall is unavailable, not zero.
